

Postdoc position for breast cancer microRNA-mRNA network studies

Konu Lab in the Dept. Molecular Biology and Genetics at Bilkent University Ankara is looking to hire a postdoctoral researcher for a TUBITAK funded project focusing on deciphering microRNA-mRNA networks driven by cholinergic signals in breast cancer. Candidates should have practical knowledge of bioinformatics and/or molecular biology and genetics. Familiarity with microarray data analysis and networks as well as experience in molecular biology techniques for cell culture and microscopy is desirable. A PhD is required. This position is funded for 32 months starting from March 2015. Interested applicants should send a pdf with a CV, a statement of research interests, and contact information for three referees to Ozlen Konu at konu@fen.bilkent.edu.tr (please indicate *postdoc Bilkent* in the subject line). Bilkent University Dept. Molecular Biology and Genetics is a highly regarded establishment with excellent research and education facilities located in Ankara Turkey. <http://web2.bilkent.edu.tr/mbg/ozlen-konu/> and <http://web2.bilkent.edu.tr/mbg/research/>
